

Creating a Good Experience on Online

Online gatherings are an excellent way to stay in touch with our siblings across the world. Although miles separate us, we continue to enjoy the *Blessings of Community* from the comfort of our homes. The convenience of technology enables online worship experiences, previously considered impossible.

Here are a few items to keep mind as you log in for online worship gatherings. Following these tips will allow for a better experience in your online gathering for you and fellow participants.

- Make sure you are in a well-lit room
- Log in early to check your internet connection
 - Log in with a laptop, desktop, or tablet if able (phones make participating fully more difficult)
- Check your audio settings before logging in
- Clean your webcam screen
- All microphones will be muted upon entry to minimize feedback and/or background noise
- Practice using the “Chat” feature
- Practice using the “Raise Hand” feature
- Come fully awake and ready to respond!

This is not an exhaustive list; however, these tips will help us promote communities of joy, hope, love, and peace online!
